PREVIOUS YEAR PAPER

UP PGT 2021 — Psychology (Series A)

UP PGT · 17 or 18 August 2021

125 questions · +3.4 for a correct answer, −0 for a wrong one · 120 minutes

The official booklet is a scan with no text; ExamBharo typed this paper from it by hand. Report a typing slip through exambharo.com/contact/.

Questions from the U.P. Secondary Education Services Selection Board's paper of 17 or 18 August 2021. Each question is followed by its answer, and the answer key is repeated on the last page.

Take it as a timed practice test: exambharo.com/up-pgt/previous-year-papers/up-pgt-2021-psychology-series-a/

Psychology

1. "Attention is similar to the light of torch which keeps on moving right-left, front-back, up-down". Which phenomenon is shown in the statement ?

(a) Selective attention
(b) Division of attention
(c) Vigilance
(d) Fluctuation of attention

Answer: (d)

2. There is a direct relationship between the reliability of a test and its length

(a) This statement is always true
(b) This statement is false
(c) This statement is true under certain conditi
(d) This relationship does not hold

Answer: (a)

3. Verbal behaviour that is reinforced when someone else's verbal response is repeated verbation is called

(a) Autoclitic behaviour
(b) Echoic behaviour
(c) Reinforced behaviour
(d) Operant behaviour

Answer: (b)

4. What governs the behaviour of salesperson getting a bonus for achieving sales target ?

(a) Primary reinforcement
(b) Secondary reinforcement
(c) Consequent reinforcement
(d) Probability of reinforcement

Answer: (b)

5. All our thoughts and feelings about ourselves is an answer to the question "What can I do" are referred to as

(a) Self-Concept
(b) Self-Esteem
(c) Self-Worth
(d) Self-Efficacy

Answer: (d)

6. Which of the following specialities in psychology deal with diagnosis and treatment of disorders ?

(a) Developmental
(b) Clinical
(c) Personality
(d) Experimental

Answer: (b)

7. Who first gave the motion that memory is based on constructive process ?

(a) Bortlett
(b) Jackson
(c) Atkinson
(d) Lockhort

Answer: (a)

8. Which one of the following is a product in Guilford's model ?

(a) Evaluation
(b) Cognition
(c) Transformation
(d) Symbols

Answer: (c)

9. In specific terms job analysis describes

(a) Personal characteristics
(b) Nature and component of tasks
(c) Personal requirements
(d) Package of skills applicable to different jobs

Answer: (b)

10. While learning to type, when conflict occurs between higher order and lower order learning ?

(a) Shift from letter habit to word habit
(b) Shift from word habit to letter habit
(c) No shift from letter habit to word habit
(d) No shift from word habit to letter habit

Answer: (a)

11. Information in short-term memory enters long-term memory through
(a) Elaborative rehearsal
(b) Simultaneous rehearsal
(c) Maintenance rehearsal
(d) Sequential rehearsal

Answer: (a)

12. Guidelines for counselling and guidance of each of the school stages are given in
(a) National Curriculum Framework (NCF, 2005)
(b) National Curriculum Framework for School Education (NCFSE, 2000)
(c) National Programme of Action, 1992
(d) National Policy of Education, 1986

Answer: (a)

13. Ramesh was caught thrice for exceeding speed limit while driving. Among the two choices given by court he chose to attend the driving classes instead of loosing driving license. This is an example of
(a) Positive punishment
(b) Positive reinforcement
(c) Negative reinforcement
(d) Negative punishment

Answer: (c)

14. Which approach is not based on experimental s' es ?
(a) Cognitive approach
(b) Behavioral approach
(c) Psychoanalytic approach
(d) Neuro-biological approach

Answer: (c)

15. In which year third revision of Binet-Simon scale was published ?
(a) 1950
(b) 1960
(c) 1954
(d) 1937

Answer: (b)

16. Among the following what depicts the relative importance of heredity and environment in moulding of personality ?
(a) Traits
(b) Feature of the environment
(c) Scope of environmental forces
(d) All of the above

Answer: (d)

17. Greater detail about background and experiences of job-applicants are sought in
(a) Biographical inventories
(b) Application blanks
(c) Recommendation forms
(d) Reference reports

Answer: (a)

18. Employee management conflicts can be effectively dealt with by
(a) All given below
(b) Problem solving orientation
(c) Making compromises
(d) Use of arbitration

Answer: (a)

19. After one week interval, participants of an experiment on recall of cued pictures, were asked to recognize the pictures. In which of the following condition recognition scores were higher ?
(a) Physically similar destructor
(b) Socially similar destructor
(c) Prototype similar destructor
(d) Original picture

Answer: (c)

20. Coronary heart disease is related to
(a) Type D behaviour
(b) Type C behaviour
(c) Type B behaviour
(d) Type A behaviour

Answer: (d)

21. According to Carl Jung, collective unconscious is a common reservoir of images derived from
(a) Our early repressed desires
(b) Our unfulfilled desires
(c) Our ancestors' universal experiences
(d) Our early sexual tensions

Answer: (c)

22. Which condition contributes to permanence in group tension ?
(a) Common goals
(b) Functional co-operation
(c) Differences in values
(d) Belief that other group is more comfortable

Answer: (c)

23. 'Drivers move their vehicle at green traffic light and stop at red traffic light', the statement illustrates

(a) Operant conditioning
(b) Classical conditioning
(c) Observational learning
(d) Contiguity learning

Answer: (a)

24. The objective of development framework of National Council of Educational Research and Training (NCERT) for guidance to 11-14 years children in

(a) Developing problem-solving skills
(b) Preparing for a career
(c) Enhancing self understanding
(d) Prevention of violent behaviour

Answer: (a)

25. What is depicted by difference between object format and perception format ?

(a) Perceptual learning
(b) Illusion
(c) Delusion
(d) Hallucination

Answer: (b)

26. From the point of view of experimental operatio classified variables are

(a) Relevant and mediating variables
(b) Qualitative and quantitative variables
(c) Active and attribute variables
(d) Dependent and independent variables

Answer: (d)

27. The two primary symptoms of mood disorders are

(a) Mania and Insomnia
(b) Depression and anorexia
(c) Depression and suicidal thoughts
(d) Depression and mania

Answer: (d)

28. Intelligence Quotient (I.Q) is a

(a) Norm
(b) Raw score
(c) Score of verbal intelligence
(d) Score of non-verbal intelligence

Answer: (b)

29. Who propounded filter attenuation theory of attention ?
(a) Treismann
(b) Bradvent
(c) Moore
(d) Sherry
Answer: (a)

30. 'Expectation of long straight drive keeps a golfer at the game despite many balls lost'. This statement illustrates
(a) Secondary reinforcement
(b) Partial reinforcement
(c) Primary reinforcement
(d) Complete reinforcement
Answer: (b)

31. Computer assisted instruction in classroom involves principles of
1. Classical conditioning
2. Operant conditioning
Select the correct answer using the code given below
(a) Only 1 is correct
(b) Only 2 is correct
(c) Both 1 and 2 are correct
(d) Both 1 and 2 are incorrect
Answer: (b)

32. Which type of persons experience stress . ften ?
(a) Type D persons
(b) Type A persons
(c) Type E persons
(d) Type B persons
Answer: (b)

33. In Rorschach Ink Blot Test, responses reflect
(a) Our inner conflicts
(b) Our inner experience
(c) Our inner feelings
(d) Our inner conflicts and feelings
Answer: (d)

34. The correct sequence of different stages of psycho-sexual development is
(a) Anal, Oral, Phallic, Genital, Latency
(b) Anal, Phallic, Oral, Genital, Latency
(c) Oral, Anal, Latency, Phallic, Genital
(d) Oral, Anal, Phallic, Latency, Genital
Answer: (d)

35. The tendency of the eyes to turn towards each other in a co-ordinated action to fixate on targets located nearby is called

(a) Equipotentiality
(b) Consonance
(c) Dichromatism
(d) Convergence

Answer: (d)

36. Voluntary control over physiological processes can be obtained by using principles of

(a) Psychosomatic medicine
(b) Cognitive medicine
(c) Behavioural medicine
(d) Humanistic medicine

Answer: (c)

37. In retrograde amnesia, which of the following kind of problem is seen ?

(a) Problems with recalling previously learned material
(b) Problems with face recognition
(c) Difficulty finding routes
(d) Poor encoding of verbal material

Answer: (a)

38. When individuals look at a distant object, size is [illegible]ged by

(a) Perspective
(b) Object
(c) Compromise between perspective and ob[illegible]t
(d) Sensory features

Answer: (c)

39. Influence of expectations of tester on responses of testee is known as
1. Self-fulfilling prophecy
2. General motivational feedback
Select the correct answer using the code given below

(a) Only 1 is correct
(b) Only 2 is correct
(c) Both 1 and 2 are correct
(d) Both 1 and 2 are incorrect

Answer: (a)

40. 'Students get as much marks in the examinations as much hard work they put in their studies'. This statement illustrates

(a) Correlational method
(b) Naturalistic observation method
(c) Structured observation method
(d) Participant observation method

Answer: (a)

41. Which of the drive is depicted in the following statement ?
"Individuals experiencing monotony in life seek exciting stimuli".

(a) Exploratory drive
(b) Aggressive drive
(c) Fear drive
(d) Biological drive

Answer: (a)

42. Who propounded the classification of individuals into personality type on the basis of body build ?

(a) Tylor
(b) Sheldon
(c) Jung
(d) Bandura

Answer: (b)

43. Basis of quantification of behaviour in observational studies is

(a) Frequency method
(b) Duration method
(c) Interval method
(d) All of the above

Answer: (d)

44. How short-term memory differs from long-term memory ?

(a) Capacity
(b) Rehearsal
(c) Coding
(d) All of the above

Answer: (d)

45. Inability to recognise objects and their meanings due to damage in the brain is characteristic of

(a) Agraphia
(b) Alexia
(c) Amnesia
(d) Agnosia

Answer: (d)

46. Every selection programme must be investigated to determine
(a) Stability of programme
(b) Consistency of programme
(c) Generalisability of programme
(d) Predictive accuracy of programme
Answer: (d)

47. What drives human behaviour according to social learning theory ?
(a) Internal forces
(b) External stimulation
(c) Anticipated consequences
(d) Actual consequences
Answer: (c)

48. What are the two ways in which psychological disorders can be treated ?
(a) Hypnosis and counselling
(b) Psychotherapy and biomedical therapy
(c) Counselling and guidance
(d) Medicines and surgery
Answer: (b)

49. Which of the following is not one of the Big Five p onality factors ?
(a) Submissiveness
(b) Agreeableness
(c) Extroversion
(d) Openness of experience
Answer: (a)

50. A change in behaviour occurring as a result of expectation of change rather than as a result of change is known as
(a) Effect of insight
(b) Expectancy effect
(c) Placebo effect
(d) Effect of encouragement
Answer: (c)

51. An analysis of observational learning acknowledges that
1. Principles of reinforcement influence behaviour
2. Individuals have the capacity to use their cognitive processes. Through this they can change their behaviour with cognitive rewards and punishments.
Select the correct answer using the code given below

(a) Only 1 is correct
(b) Only 2 is correct
(c) Both 1 and 2 are correct
(d) Both 1 and 2 are incorrect

Answer: (c)

52. Which theory focusses upon the study of potential of human beings ?

(a) Humanistic theory
(b) Cognitive theory
(c) Socio-cultural theory
(d) Psycho-dynamic theory

Answer: (a)

53. On which level of arousal curve, attention is most effective ?

(a) At the lower level of arousal curve
(b) At the higher level of arousal curve
(c) At the peak of arousal curve
(d) At the lower and higher level of arousal curve

Answer: (c)

54. How position of an individual relative to ot[illegible]ividuals is illustrated in test results ?

(a) Standard scores
(b) Obtained scores
(c) Number of correct responses
(d) Number of items answered

Answer: (a)

55. Infantile amnesia is the inability to remember experiences during

(a) First year of life
(b) First two years of life
(c) First two or three years of life
(d) First five years of life

Answer: (c)

56. What is involved in social motives ?

(a) Psychological balance
(b) Social balance
(c) Feelings about self, others and relationships
(d) Feelings about relationships only

Answer: (c)

57. To produce best fit between job and prospective employees industrial psychologists attempt to search people who
1. Are best suitable for the job.
2. Will enjoy their work
Choose the correct answer using the code given below.

(a) Only 1 is correct
(b) Only 2 is correct
(c) Both 1 and 2 are correct
(d) Both 1 and 2 are incorrect

Answer: (a)

58. A person who visits dentist every six months for dental checkup is engaged in

(a) Health protective behaviour
(b) Compulsive behaviour
(c) Modelling of parental behaviour
(d) Belief in decay of tooth

Answer: (a)

59. 'Birds of a feather flock together'. The statement demonstrates law of

(a) Similarity
(b) Continuity
(c) Nearness
(d) Common region

Answer: (a)

60. Why communal riots occur ?

(a) Awareness of tenets of religion
(b) Contact between rioting groups
(c) Repression of anti-social tendencies
(d) Ignorance about people

Answer: (d)

61. Which temporal pattern results in most effective learning ?

(a) Simultaneous conditioning
(b) Background conditioning
(c) Trace conditioning
(d) Delayed conditioning

Answer: (d)

62. Read two conditions given below :
1. Antecedent conditions are presented in first part of hypothesis.
2. Consequent conditions are presented in second part of hypothesis
Select the correct answer using the code given below

(a) Only 1 is correct
(b) Only 2 is correct
(c) Both 1 and 2 are correct
(d) Both 1 and 2 are incorrect

Answer: (c)

63. Schema of a theory implies that
1. Hypothesis is a specification of theorem.
2. Theorem is a deduction from postulate.
Select the correct answer using the code given below

(a) Only 1 is correct
(b) Only 2 is correct
(c) Both 1 and 2 are correct
(d) Both 1 and 2 are incorrect

Answer: (c)

64. On the basis of whose work factor theory approach to intelligence was developed ?

(a) Spearman
(b) Jensen
(c) Piaget
(d) Wechsler

Answer: (a)

65. 'Normal and abnormal behaviour are acquired in the same way through the operation of internal and external environmental influences or contingencies. This is the view of

(a) Behavioural model
(b) Medical model
(c) Cognitive model
(d) Psychoanalytical model

Answer: (a)

66. Among the following which one is not a projective test ?

(a) Minnesota Multiphasic Personality Inventory
(b) Somatic Ink Blot systems
(c) Thematic Apperception Test
(d) Rorschach Ink Blot Test

Answer: (a)

67. A hunter continuous to hunt even in the absence of instrumental significance. This statement is an example of

(a) Primitive drive
(b) Tension reduction model
(c) Biological goals
(d) Functional autonomy

Answer: (d)

68. Effect of drug in experimental conditions can be evaluated on the basis of

(a) Placebo
(b) No drug condition
(c) Proper control
(d) Subject variables

Answer: (a)

69. Group tests can be differentiated from individual tests on the basis of

(a) Form and arrangement of items
(b) Testing situations
(c) Role of tester
(d) All of the above

Answer: (d)

70. When an individual is caught between two repell threats, fears or situations, it is a

(a) Avoidant-avoidant conflict
(b) Approach-approach conflict
(c) Approach-avoidant conflict
(d) Multiple approach-avoidant conflict

Answer: (a)

71. Which term is used for perception of same figure-ground even after separation of figure-ground ?

(a) Figural continuity
(b) Figural constancy
(c) Figural persistency
(d) Figural stability

Answer: (c)

72. 'View of sunset is not an objective reality'. This statement demonstrates

(a) Perceptual construction
(b) Influence of motives on perception
(c) Influence of emotions on perception
(d) Habit of engaging in reality testing

Answer: (a)

73. Vocational guidance implies
1. Educational guidance
2. Providing reliable and dependable information about careers
Select the correct answer using the code given below

(a) Only 1 is correct
(b) Only 2 is correct
(c) Both 1 and 2 are correct
(d) Both 1 and 2 are incorrect

Answer: (c)

74. 'Systematic desensitization is used for treatment of people with irrational fears'. This statement demonstrates

(a) Discrimination of conditioned response
(b) Disappearance of conditioned response
(c) Acquisition of conditioned response
(d) Re-emergence of conditioned responses

Answer: (b)

75. Insight learning can be explained on the basis of

(a) Stimulus-response sequence
(b) Cognitive relationship between means and end
(c) Gradual solution rule
(d) Mechanical skills

Answer: (b)

76. Sub-tests of WAIS-R are numbered acco

(a) Order of difficulty
(b) Order of administration
(c) Age-levels
(d) Representatives of normative sample

Answer: (b)

77. Incentive motivation is a form of

(a) Push mechanism
(b) Pull mechanism
(c) Pull and push mechanism
(d) Neither pull nor push mechanism

Answer: (b)

78. Event sampling is characteristic of

(a) Quasi-experiments
(b) Case study
(c) Observation
(d) Interview

Answer: (c)

79. Which of these is the most sensitive measure of memory ?
    (a) Recognition
    (b) Cued-Recall
    (c) Re-learning (saving)
    (d) Recall
    Answer: (c)

80. Who propounded the theory of extrinsic and intrinsic motivation ?
    (a) Desi
    (b) Hebb
    (c) Schachter
    (d) Nisbett
    Answer: (a)

81. The number of cycles or frequency of sound wave per second determines
    (a) Pitch
    (b) Loudness
    (c) Timbre
    (d) Amplitude
    Answer: (a)

82. Vocational guidance and vocational counselling *a*
    (a) Similar in nature
    (b) Distinct in nature
    (c) Means of self-discovery
    (d) Similar as well as distinct in nature
    Answer: (b)

83. It is not possible to thread a needle or ride a bicycle
    (a) With form perception
    (b) Without form perception
    (c) Without depth perception
    (d) With depth perception
    Answer: (c)

84. Group tension cannot be reduced by
    (a) Category driven processing
    (b) Attribute driven processing
    (c) Affirmative action programmes
    (d) Accuracy of impression formation
    Answer: (a)

85. Which schedule of reinforcement generates the highest rate of responding and the greatest resistance to extinction ?

(a) Fixed ratio schedule

(b) Fixed interval schedule

(c) Variable ratio schedule

(d) Variable interval schedule

Answer: (c)

86. Who propounded psychosocial theory of personality development ?

(a) Freud

(b) Sullivan

(c) Erikson

(d) Jung

Answer: (c)

87. According to Freud, which of the following control most, not all of our behaviour ?

(a) Conscious experience

(b) Gestalt perception

(c) Unconscious

(d) Observable experience

Answer: (c)

88. Your heart is racing, your breathing is rapid and your mouth is dry. What emotion are you experiencing ?

(a) Anger

(b) Fear

(c) Happiness

(d) It is not always possible to distinguish emotions by physiological reactions only

Answer: (d)

89. Sense of the location of body parts in relation to the ground and each other is called

(a) Vestibular sense

(b) Olfactory sense

(c) Kinesthetic sense

(d) Visual sense

Answer: (c)

90. Advocacy of educational guidance illustrates

(a) Individual differences need to be recognised

(b) Insignificance of relationship between guidance workers and teachers

(c) Future plans are salient, present can be ignored

(d) Usage of variety of methods is not advantageous

Answer: (a)

91. Impulsiveness is not governed by
    (a) Know and go system
    (b) Stress
    (c) Choice of immediate rewards
    (d) Doing a less effortful task

    Answer: (a)

92. Strong beliefs in casteism result in
    (a) Division of social world into 'us' and 'them'
    (b) Identity fusion bias
    (c) Willingness to engage in extreme actions to protect own caste
    (d) All of the above

    Answer: (d)

93. Wechsler intelligence test is a
    (a) Verbal test
    (b) Nonverbal test
    (c) Verbal and nonverbal test
    (d) Performance test

    Answer: (c)

94. Promise of gifting a watch, if Ramesh achieves ab e 95% marks in examination exemplifies
    (a) Intrinsic reward
    (b) Extrinsic reward
    (c) Both intrinsic and extrinsic reward
    (d) Neither intrinsic nor extrinsic reward

    Answer: (b)

95. Among the following which one is not a theory of intelligence ?
    (a) Coci's biological theory
    (b) Anderson's theory
    (c) James-Lange theory
    (d) Gardner's theory

    Answer: (c)

96. Why parallel lines appear to converge in the distance ?
    (a) Interposition
    (b) Linear perspective
    (c) Atmospheric perspective
    (d) Texture

    Answer: (b)

97. In which country wages for strikes are permissible ?

(a) USA
(b) UK
(c) Australia
(d) India

Answer: (d)

98. If the experimenter and subjects, both are not aware of the experimental and control groups, it is called

(a) Hypothesis testing
(b) Single blind study
(c) Random study
(d) Double blind study

Answer: (d)

99. Achievement motivation is

(a) Only cognitive
(b) Only mechanistic
(c) Partially cognitive and partially mechanistic
(d) Determined by arousal

Answer: (c)

100. Ratings are subject to varieties of errors. One general class of error consisting of the 'halo effect; error of severity, error of leniency and error of central tendency is called

(a) Constant errors
(b) Contrast errors
(c) Logical errors
(d) Proximity errors

Answer: (a)

101. Which view of memory is similar to office filing system ?

(a) Cognitive view of memory
(b) Behaviouristic view of memory
(c) Neurological view of memory
(d) Social view of memory

Answer: (a)

102. Which of the following depicts the difference between episodic and semantic memory ?

(a) Information that cannot be expressed verbally
(b) Source monitoring
(c) Reality monitoring
(d) Activity of different brain regions

Answer: (d)

103. Which of the following is responsible for increase of secretion in outward expression of anger ?

(a) Epinephrine
(b) Nor epinephrine
(c) Pituitary gland
(d) Medulla

Answer: —

104. Out of the following which one is not a method of measuring reliability ?

(a) Test-Retest
(b) Alternate-form
(c) Predictive
(d) Split-Half

Answer: (c)

105. On which of the following efficiency of sense working in the world depends upon ?

(a) Feature based processing
(b) Whole based processing
(c) Dis-sociable subsystems
(d) Associative subsystems

Answer: (c)

106. Which of the following has not been studied as a cause of aggressive behaviour ?

(a) Marijuana
(b) Frustration
(c) Pain
(d) Alcohol

Answer: (a)

107. Selection interview is

(a) Expression of individuality of interviewer
(b) Expression of flexibility of interviewer
(c) Expression of non-circularity in interview situation
(d) Conversion with a purpose

Answer: (d)

108. Guidance focusses upon

(a) Seeking solution to a problem
(b) Giving information
(c) Giving advice
(d) Interpreting information

Answer: —

109. In which field of psychology memory capabilities of victims and witness to crimes are studied ?
(a) Social psychology
(b) Community psychology
(c) Developmental psychology
(d) Cognitive psychology
Answer: (d)

110. Difference threshold is defined as
(a) Quality of stimulus
(b) Quality of response
(c) Statistical quality
(d) Non-statistical quality
Answer: (c)

111. Bio-social definition equates personality to the
(a) Efforts of adjustment carried out by the individual
(b) Specific qualities of the individual
(c) Pattern of discrete responses
(d) Social stimulus value of the individual
Answer: (d)

112. Emotional expression of an adult is
(a) Innate
(b) Learned
(c) Innate and learned
(d) Culture non-specific
Answer: (c)

113. Preamble of Mental Health Care Act, 2017
(a) Talks about problems of aggression and violence
(b) Promises to provide mental health care services for mentally ill persons
(c) Talks about problems of internet addiction
(d) Takes into account the significant contributions of family
Answer: (b)

114. Mechanical ability tests for predicting success in jobs requiring mechanical skills are part of
(a) Personality tests
(b) Performance tests for intelligence
(c) Achievement tests
(d) Vocational aptitude tests
Answer: (d)

115. According to Cannon-Bord theory of emotions

(a) Bodily changes precede emotional experiences

(b) Bodily changes follow emotional experiences

(c) Bodily changes and emotional experiences occur simultaneously

(d) Emotional expressions precede as well as follow bodily changes

Answer: (c)

116. Guidance is based on the following concept

(a) Each person has the right to choose his way of life

(b) Each person has the right to choose the way of life for others

(c) Each person has innate ability to make intelligent choices

(d) Each person has the right to put responsibility of self on others

Answer: (a)

117. The lasting behaviours, thoughts and emotions that specify how do we react and adapt to other people and situations make up our

(a) Attitudes

(b) Beliefs

(c) Personality

(d) Intelligence

Answer: (a)

118. In emotional response _____ shall occur.

(a) Increase in sweat gland activity

(b) Lowering of skin resistance

(c) Rise in skin conductance

(d) All the above

Answer: (d)

119. Psychological implications for individual development are not involved in

(a) Advice

(b) Educational guidance

(c) Counselling

(d) Vocational guidance

Answer: (a)

120. 'According to Beck depressed people always see negative consequences'. This statement demonstrates

(a) Selective abstraction

(b) Global attribution

(c) Maximization and minimization

(d) Polarization

Answer: (a)

121. Largely it is a phenomenon of modern life, when the individual feels that life is meaningless. An emptyness and loneliness just drown the individual in a state of helplessness and hopelessness. It is known as

(a) Conversion disorder

(b) Antisocial personality disorder

(c) Existential anxiety

(d) Multiple personality disorder

Answer: (c)

122. Transformation of sensory input into a form that can be processed by memory system is known as

(a) Decoding

(b) Encoding

(c) Storage

(d) Retrieval

Answer: (b)

123. Which theory of emotions advocates that subjective emotional experiences are actually the result of physiological changes ?

(a) Cannon-Bord theory

(b) James-Lauge theory

(c) Opponent process theory

(d) Two-factor theory

Answer: (b)

124. Researches on whom provide evidence t. ception is innate ?
